

BOEN

Live Pure™
Protects your floor's wild side.

Your parquet floor doesn't have to stay flawless – but it should still look good, even after years. Wood seems to be the perfect material for achieving this: warm, lively and surprisingly robust.

Live Pure™
Protects your
floor's wild side.

With the innovative **Live Pure™** surface treatment, the wood's natural durability is taken to a new level. This surface creates a natural look for your floor, while offering premium protection.

The protection is barely visible yet tangibly strong. For a floor that can take (almost) anything.

High scratch resistance. Your floor can withstand quite a lot, meaning that you can move around freely without having to worry about scratches all the time. Your parquet is forgiving, even if something falls onto it.

Optimum UV protection. The innovative surface makes sure that sunlight has virtually no effect on your parquet's original colour.

Naturally matt look. The invisible lacquer makes the wood appear untreated, thereby bringing a great deal of natural character into your home.

High resistance to water and chemicals. Whether it's spilled water or other mishaps: your floor can handle it. The protective Live Pure™ formula will confidently keep liquids at bay.

Lower effort for cleaning and care. Less work, more living. The floor's dirt-repellent surface is family-friendly, giving you more time for the enjoyable things in everyday life.

Natural ingredients. Gentle for the planet, safe for you: The surface does not contain plasticisers or any other harmful components, ensuring a good feeling with every step.

Naturally beautiful. Perfectly protected.

Your benefits

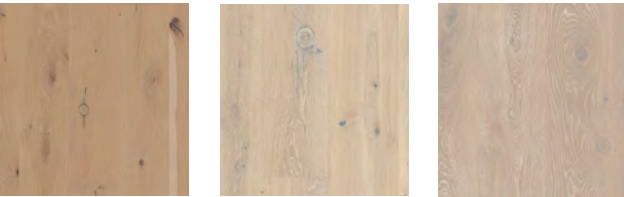

Live Pure™

The innovative formula and elaborate multi-layer lacquer treatment ensure that Live Pure™ penetrates the wood's deepest pores. This **takes away virtually any chance of dirt** getting in.

Thanks to its very matt finish, Live Pure™ lacquer has one of the **lowest levels of gloss on the market**. The result is a natural, cosy look that still brings all the conventional **advantages of a lacquered surface**.

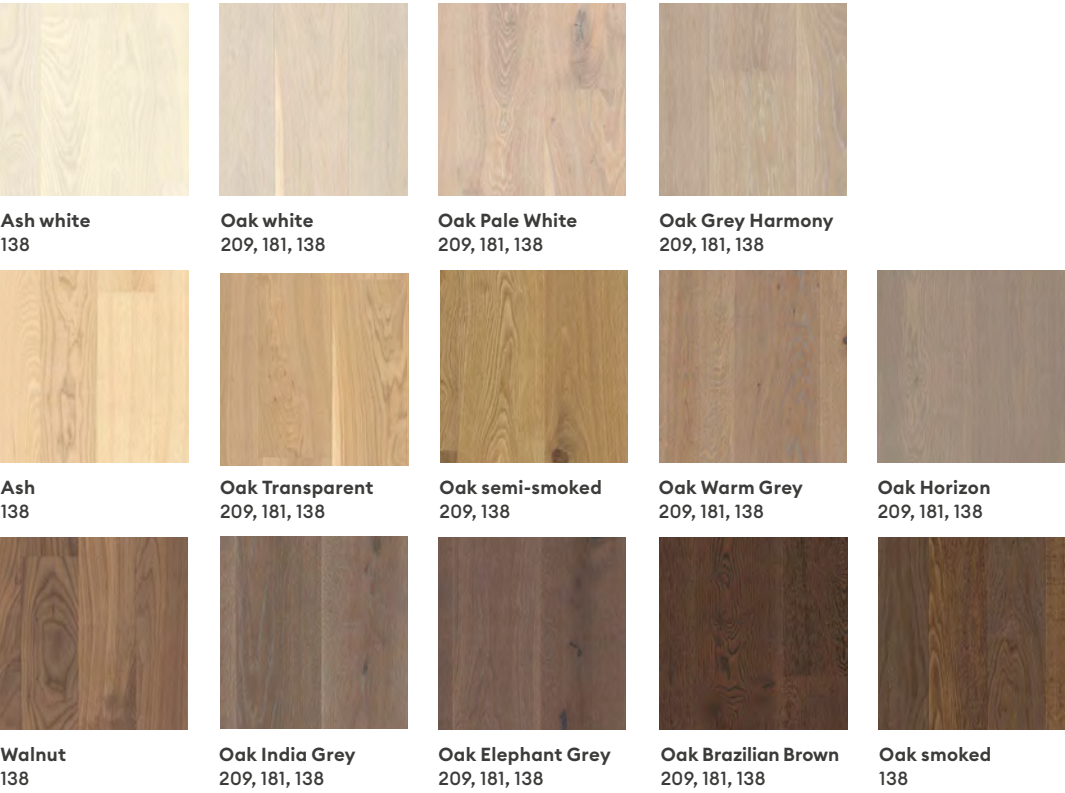

Not even long-term exposure to UV light can damage the floor's natural appearance. Live Pure™ **slows the colour change process down**, ensuring that your floor's natural tone endures for years, without any yellowing.
